Work History

2016-05 -
2023-07

Cofounder / Front End Specialist

1STi, Rio de Janeiro - RJ

Founded the company back in 2016 with six people and help the company grow ten times in the last seven years. I was the lead frond-end engineer responsible for architectural decisions on all platforms that we built. Specialized in the react ecosystem I always delivered the best quality code using tools like react, react-native, redux, mobx.

2016 - 2017

Responsible to code the entire front-end of a CRM System for Cogna Education using react, redux and high fidelity UI code based on design specs.

2018 - 2021

Built a visual collaboration board (Strytegy) from the ground up using react, mobx, konva.js, daily.js, websocket, graphql, cypress. Responsible to lead the team and deliver new features on the platform.

2021 - 2022

Built a telemedicine front-end heavily used in Sírío Libanês (the second largest hospital in Brazil) using react and webrtc technology.

Code a scheduling system mobile-first interface used by all employees of the hospital to be vaccinated during Covid-19 pandemic using react, hooks, styled-components.

Code from the ground up a mobile application for doctors of Sírío Libanês and was responsible for all architectural decisions of the app and lead the team to deliver a smooth and robust app with beautiful UX using react-native (expo), hooks, styled-components, and a CI/CD
