Dear Hiring Manager,

I am writing to express my keen interest in your available position. As a Co-Founder and Front-End Specialist, I possess a unique blend of entrepreneurial and highly developed technical skills. With a history of successful business development and team building.

In 2016, I co-founded 1STi in Rio de Janeiro, a consultancy company that I helped expand from a modest six-person team to a dynamic, thriving organization tenfold larger within seven years. As the lead front-end engineer, I made instrumental architectural decisions on all platforms we built, leveraging my specialization in the React ecosystem to ensure top-tier code quality.

Among my various projects, I had the privilege of serving Sírío Libanês, the second-largest hospital in Brazil. I took part in a series of key developments for them, including building a telemedicine front-end with React and WebRTC technology, coding a scheduling system for their vaccination program during the Covid-19 pandemic, and creating a custom mobile application for their doctors. These projects demanded not just technical proficiency but also a thorough understanding of user needs and user-friendly interface design. For the mobile application, in particular, I was responsible for all architectural decisions, using technologies such as React Native, Hooks, and Styled-components, and establishing a CI/CD pipeline with Azure DevOps.

One of the projects I'm particularly proud of is the development of Strytegy, a real-time visual collaboration tool. Built from scratch, this platform demanded an in-depth understanding of React, MobX, Konva.js, Daily.js, WebSocket, GraphQL, and Cypress. This project was an ambitious endeavor as it required me to manage a team and ensure the continuous delivery of innovative features on the platform, all while maintaining high performance and user-friendly interface.

I look forward to potentially applying my entrepreneurial spirit, leadership,

and technical expertise to benefit your team. Thank you for considering my application, and I am eager to discuss how I could contribute to your organization.

Sincerely,
Ygor Fonseca
